

CÉSAR AGUIRRE

Senior Full-Stack Engineer

cesarag89@gmail.com | +57 318 655 3952 | LinkedIn | GitHub | cesar-aguirre.world

PROFESSIONAL SUMMARY

Full-stack engineer with 12+ years building scalable web applications, SaaS platforms, and AI-powered products. Proven track record leading engineering teams and architecting distributed systems across startup and enterprise environments. Specialized in Python, Node.js, React, and AWS. Multilingual communicator with broad cross-cultural perspective and high adaptability under pressure.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Node.js | **Frontend:** React, Angular, HTML5, CSS3, Tailwind CSS
Backend: Django, Express.js, REST APIs, Microservices | **Cloud & DevOps:** AWS (Lambda, RDS, Bedrock, S3), CI/CD, Docker
AI/ML: AWS Bedrock, LLM Integration, Machine Learning, NLP | **Data:** MongoDB, PostgreSQL, SQL, Redis

PROFESSIONAL EXPERIENCE

Software Development Engineer | Katapult Labs (Remote)

May 2025 — Present

- Architect and deliver full-stack AI-first applications (getbuddy.com, trashie.io), building complete startup ecosystems from backend APIs to frontend interfaces
- Integrate generative AI via LLMs to automate workflows, reducing manual processing time ~60%; design scalable AWS infrastructure across multiple product lines

Career Break — Bikepacking South America

May 2024 — Apr 2025

- Solo bicycle journey across South America: navigated remote terrain, extreme weather, and diverse local contexts across multiple countries — building mental resilience, autonomous problem-solving under adversity, and deep cross-cultural fluency directly transferable to distributed, high-pressure engineering teams

Software Development Engineer | Playvox, Colombia

Jun 2022 — Apr 2024

- Engineered Python (Django) and Node.js backends for enterprise contact center clients; integrated AWS Bedrock AI for intelligent automation of customer interaction analysis
- Built serverless data pipelines (Lambda + RDS) processing thousands of daily transactions on 2-week Agile sprint cycles

R&D Leader / Software Engineer | IAS Software, Colombia

Jul 2017 — May 2022

- Led 6+ engineers to design and launch SaaS products for insurance and banking; defined architecture, drove revenue growth, and mentored junior developers
- Designed and maintained enterprise systems serving thousands of end users; provided full-stack consultancy for banking clients

R&D Engineer | Vega Energy, Colombia

Jan 2015 — Feb 2017

- Developed IoT prototypes for industrial telemetry from circuit design to firmware; built web interfaces for real-time sensor data visualization

EDUCATION

B.S. Electronic Engineering | Universidad Nacional de Colombia | 2007–2012 — 3 peer-reviewed publications (IEEE, Springer) on ML for predictive maintenance; Thesis: fishery sustainability monitoring system (SIMASPE)

ADDITIONAL

Languages: English (Professional), Spanish (Native), Portuguese (Conversational) | **Leadership:** Warmshowers Foundation Board Member | LIF Fellow (RAENG)
